

Overview of PULSE for Improved Inventory Management

PULSE INVENTORY PRO
OPTIMIZES QUANTITIES / AUTOMATIC REORDERING

Better Visibility:

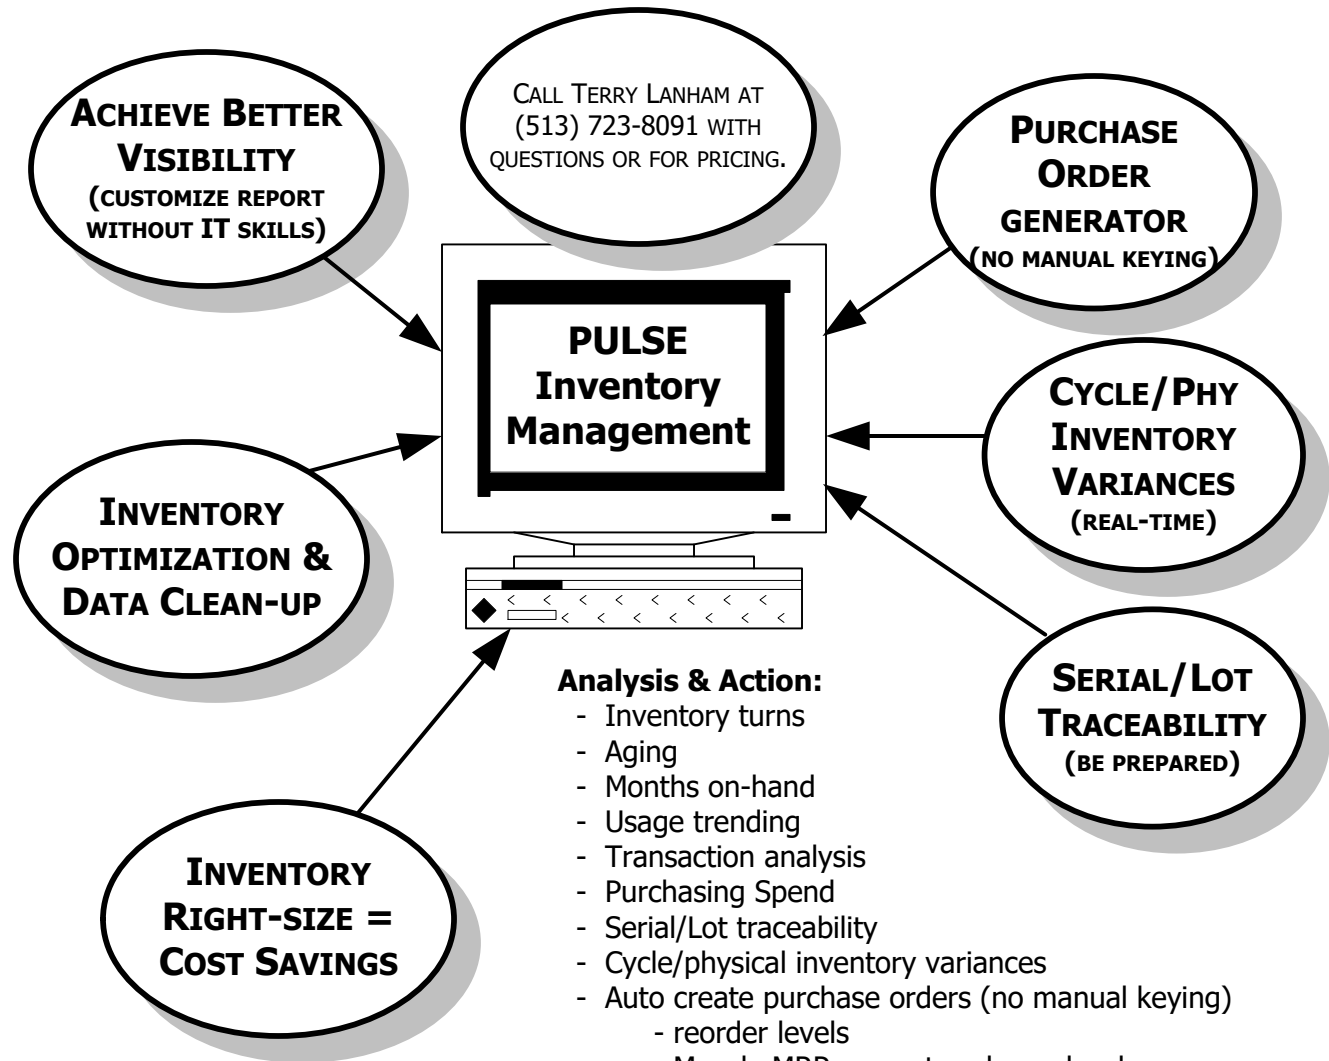

- Detailed item analysis
 - On-hand, on-order, allocated
 - Inventory turns
 - Obsolete items
- Shortages over next X days
- Easy to read stock status reports
 - by location/item/bin/serial/lot
- Bill of material & where-used
- Use PULSE MRP or Macola MRP
- Easily modify screens w/o IT knowledge

Optimization & Data Clean-up:

- Pinpoint:
 - data integrity errors
 - data exceptions
- Develop inventory plan for every part
- On-demand accurate re-calculating of:
 - ABC class codes
 - min/max/safety stock levels
 - vendor lead time from history
- Daily re-calculating:
 - months of inventory on-hand
 - inventory 3, 6, 12 month usage trends
 - inventory turns
 - inventory aging

Note: Most of the above features are build into the standard PULSE Dashboard Inventory module, but some require the licensing of the Designer module and a few are priced separately.
